

These are alternate Omnitron-V standups, which can be easier to use on 3D terrain than the standard 3-hex Omnitron-V token or mini.

Each of these standups represents one of Omnitron-V's hexes. As you move Omni around the map, keep all three together in adjacent hexes. Because there are three individual standups rather than just one, you can place him in hexes with differing elevation more easily.
