

• Cut this piece along its top and back, leaving its bottom-most edge attached.

• You will fold it down to form the top of the lower arm of the "F".

• There are no flaps to cover the undersides of the arms of the "F".

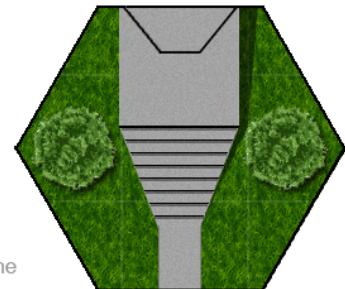

• This flap will be folded under and glued to the corresponding shape on the base. This will anchor the back of the tower to the base.

• This flap will be glued to the base where the stairs are. It will anchor the front of the tower to the base.

• Fold on gray lines, cut on black lines.
• I've found it's easiest to assemble the tower from the ground up, waiting to glue the "front" of the top arm of the "F" until the roof's flaps are glued down.

• These four pieces fold horizontally to form the "front" of the tower.

← cut this one along its top and bottom, leaving its back attached.

THIS IS AN ALTERNATE VERSION OF THE FREEDOM TOWER WHICH I MADE DURING PLAYTESTING, BEFORE WE KNEW THAT THE FREEDOM TOWER IN THE OFFICIAL GAME WOULDN'T JUST BE A SINGLE-HEX BUILDING.
